CSWE001 Specifications

Introduction:

Penta Wipes are a premoistened, non-woven disposable wipe. The single use wipe is impregnated with EPA preferred, biodegradable enzymatic cleaning solution. PentaWipes are compatible with all medical devices and is designed to be used for cleaning rigid and flexible endoscopes, as well as numerous other medical devices. Compatible with the following materials including metals such as anodized aluminum and stainless steel, plastic, silicon, glass and rubber.

Directions for Use:

- Surface Cleaning
  - Remove gross soil
  - Apply PentaWipe to all surfaces
  - Additional wipes may be necessary for further cleaning
  - Allow moisture to remain on surface for a minimum of two (2) minutes.
  - Rinse Well
  - Dry thoroughly

- Endoscope reprocessing
  - Apply PentaWipes to all surfaces of endoscopes
  - May be used as a pre-cleaning step to remove soil from devices in patient rooms

- Sterilization containers and trays
  - Rinse off gross soil
  - Disassemble all components
  - Wipe all surfaces thoroughly with PentaWipe
  - Rinse and dry
  - Follow with Alcohol Wipe to facilitate drying
